Hey Alex!

I did hear a couple weeks ago that it is still being looked into. The person leading this has been trying to get an answer to whether or not this will be possible but it's a bit awkward timing because the report is still, at this point, in draft form. I have heard there is some concern about presenting on it before EPA has had the opportunity to incorporate public comments and input.

I'll keep checking back on it but I think that if it's going to be possible, we probably won't know until we have more information on when the report will go final. I'll keep you updated on that. Sorry that I can't provide more of a concrete answer or even much of an update. Once the report goes final I don't think we'll have too much trouble getting someone to come give a presentation on the site.

Thanks for your patience!!!
- Sarah

Sarah,

Have you heard anything more about whether or not the project can be presented as part of the ESE seminar?

We still have an opening on November 29th and would love to hear about the Pavilion project.

Thanks,

Alex

Thanks for looking into this, Sarah!

Please let me know when you find out. We are currently putting together a doodle poll of availability for the fall seminar sessions.

Best,

Alex

Hi Alex!

At this point the investigation is still in its draft form. I'll check into what the timing for finalization is looking like at this point and let you know as soon as possible if we may be able to put something together for the fall semester.

Thanks!

- Sarah

Hi Sarah,

My name is Alex Wing, and I am a graduate student at Mines. As a member of the 2012 ESE seminar committee looking to identify excellent speakers, I would like to invite you to come and give a presentation as part of our Thursday seminar series. I understand you are very familiar with the Pavillion, WY project, and many students and faculty (very much including myself) are interested in hearing first-hand some details on the investigation and report.

Please let me know what you think.

Cheers!

Alex
